**Re: Utility Infrastructure Tour for Customers in Sunshine Valley BC**

In the spirit of building community, the SVRA is committed to provide open and transparent services, programs and government to this community. As part of this on-going commitment to the membership and community as a whole, we intermittently invite speakers, service providers and partners to share in dialogue so that the community may be adequately informed on all pertinent issues.

The SVRA respectfully requests that a tour of the SVDL utilities be made to all paying customers at your earliest convenience – but by the middle of October (before snow arrives).

We would appreciate you contacting all customers to inform them of the ‘open house’ tour of your entire utility infrastructure. If need be, the SVRA can assist you in communicating this to all customers if requested.

The purpose of this tour is to facilitate the following:

1. Educate and illustrate the customers on how water and sewer are collected, treated and managed in this community,
2. To instill confidence in the community that SVDL is a dedicated and competent owner / operator of the communities utilities,
3. A Q & A period would be appreciated – this would be solely at your discretion.

Thank you for your time and attention to this correspondence. Please interact with us through the SVRA website at [www.sunshinevalleyratepayers.org](http://www.sunshinevalleyratepayers.org) and check out our community initiatives.

Respectfully,

Rick Gagnon, SVRA President 2006
